

Getting EFY in Singapore

My sincere thanks to EFY team for testing and evaluating my project successfully and publishing it in September issue. At present, I am in Singapore, so can you please tell me where I can get EFY copy in Singapore?

M. Kathiresan

The author

EFY: Currently, we do not have any outlets in Singapore. You can visit www.efymagonline.com to buy an online copy of the magazine.

Downloading Source Codes of Projects

I purchase EFY from a book store. How can I download from your website source codes of projects published in EFY?

Ramesh K. Pandey

Through e-mail

EFY: You can download the source codes from www.efymag.com website free of cost. You need to click 'Previous Issues' button and then provide month and year of the particular EFY issue featuring the project of your interest (see screenshot below). Clicking 'Search' button will open the next page, where you can browse and select the 'Download Source Code' link given under the title of

From electronicsforu.com: Circuits

Wi-Fi Embedded Webcam published in September issue is a nice article. Can you please let me know which tools are used to design both schematic and PCB layout?

Ravikiran D. Borse

EFY: Thanks for the feedback! Both schematic and PCB layout are designed using eEDA software, an open source EDA tool.

□ I could not find detail on MRF24WB0MA Wi-Fi module used in Wi-Fi Embedded Webcam construction project. Please give a link.

Zahi

EFY: Microchip provides only data sheet for MRF24WB0MA which can be downloaded from www.microchip.com website or Google search. Microchip provides TCP-IP stack but lacks detail supporting document on Wi-Fi module. However, there are some similar macros and routines available on their website for reference.

'Spot An Error' Award Winners

In circuit idea 'Solar Charged Emergency Light and Fan' published in September issue, the value of resistors R10 and R13 in the parts list should be 22 kilo-ohms instead of 10 kilo-ohms.

Siddharth Kaul

□ In article 'Which Wireless Technology Should You Use' published in September issue, on page 46, HSDPA is wrongly defined as 'high-speed download packet access' instead of 'high-speed downlink packet access.'

Madhuram Mishra

□ In circuit idea 'Moisture Monitor for Plants' published in August issue, S1 should be an on/off switch instead of push-to-on switch.

Tuhin Mal

□ In construction project 'Variable Bench Power Supply with LCD and Monitor Display' published in August issue, please note the following corrections:

(i) In Fig. 4, 4700µF electrolytic capacitor (C5) should be replaced with larger capacitance value. Also, a 0.1µF ceramic capacitor should be included at the output of ICs LM7805 (IC3) and 7812 (IC4). The present PCB may have limitations to use a high-valued capacitor, in which case you may want to put a higher voltage transformer. However, using a higher voltage transformer will increase the input voltage to the regulator, resulting to dissipate more power and therefore needs larger heatsink!

(ii) In Fig. 5, pins 2 and 3 of DB9 connector should be connected to pins 14 and 13 of IC7, respectively. On the TTL side, pins 11 and 12 should be connected to pins 3 and 2 of IC1, respectively.

Dr Ramkumar Ramaswamy

the particular project.

VLSI Design Course

I am pursuing B.Tech in electronics & telecommunications and like EFY very much. I want to know whether EFY conducts online short-term courses on VLSI design.

Mukul Kumar

Patna

EFY: Thanks for the feedback and your interest in EFY courses. Presently, we don't have online course on VLSI design.

EFY DVD

I could not install and run the Altium Designer software given in the EFY DVD, August issue. Do I need Internet connection for installation, and what will be the user ID and password for running the software?

Joydep Poddar

Through e-mail

EFY: We have checked the mentioned software in the DVD but found no problem. You do not need Internet connection for its installation. Also, you do not need user ID and password for running the software.

Renewable Energy Projects

I have been reading EFY since last two years. Would you please suggest me any projects based on renewable energy.

Balajidevendra

Tamil Nadu

EFY: We have published many solar-based projects in earlier issues. The recent projects published in 2013 are:

1. Hybrid Solar Charger, September
2. Solar Charged-Emergency Light and Fan, September
3. Smart Solar Charger, January
