devices. Spinning hard drives offer larger capacity, but may get damaged with vibration and movement, which is usually the case when using a tablet. Make sure that the touchscreen is responsive and easy to read in direct sunlight. The on-screen keyboard should also be easy to use. If you are a movie buff, go for an HD screen.

From the keyboard point of view, a Bluetooth keyboard dock is advisable as you won't have to slide the tablet in a particular position to lock the hinges. Also check for the palm rest or trackpad, and whether the keyboard needs to be charged separately. Don't miss out on the availability of Ethernet port, microSD card slot for extra storage, and VGA or HDMI output to feed your content onto a TV. ●
