Capacitors with High Current Carrying Capability

High-quality WIMA Polypropylene capacitors are suited for high pulse and high frequency applications e.g. in switch mode power supplies, electronic ballasts and especially in converters in drives and power electronics. The WIMA range comprises:

- Self-healing, pulse duty capacitors with unlimited life expectancy

- Snubber capacitors with plate connections for best contact reliability
- GTO capacitors with dry construction
- DC-LINK capacitors with versatile and safe contact configurations.

Please contact SCI to get a free copy of "Selection of WIMA Capacitors for Pulse Applications" by WIMA.
