Smartphone with Touchless Control Technology

Motorola Moto X is a lifestyle device that offers customisable features, including one of the most unique features—touchless control technology

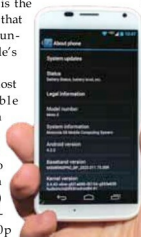

The much discussed Moto X smartphone of Motorola has finally arrived with mid-end specifications and is certainly high on style factors. Moto X is the first smartphone that Motorola has unveiled in Google's leadership.

It offers a host of customisable options, which add to the style quotient of the user. The Moto X features an 11.9cm (4.7-inch) AMOLED display with 720p HD. It runs on the Motorola X8 proces-

sor. The company is also offering a customisable variant Snapdragon S4 Pro processor with the smartphone.

Motorola positions Moto X as a lifestyle device, and one of the most unique features of the smartphone is its touchless control technology. The device comes with the capability of listening to the users and perform actions based on their instructions.

The Moto X comes packed with a 10MP rear camera with LED flash. The camera boasts of ClearPixel technology and offers 1080p full HD recording.

Two-in-One Mouse & Camera

The new 2-in-1 Cam Mouse combines a 1200dpi mouse with a 2MP camera and it is an easy-to-use device

Taiwan-based Genius company has introduced its new 2-in-1 device, Cam Mouse. It is an innovative mouse that becomes a camera with the facilities of instant photo uploading, QR code scanning and more. The Cam Mouse combines a 1200dpi mouse with a 2MP camera, bringing the best of both the worlds.

While cameras on notebooks and monitors are awkward and unwieldy, the Cam Mouse is as easy to use as a small hand-held camera. Plus it can seamlessly switch between mouse and camera modes in a split second—simply slide open the

lens cover and snap away.

The mouse also makes it easy to share photos with friends and family. It syncs with social media sites, so one can instantly upload pictures. In addition, the Cam Mouse provides photo-editing tools and scans QR codes. So if a teacher is about to erase some valuable notes off the board, or if a presenter in a meeting switches slides too quickly, one can take advantage of the Cam Mouse's speed and versatility to take a photo right when one is in need of it. The Genius Cam Mouse is available with the warranty of one year.
