Sony to Introduce Detachable Smartphone Lenses

Sony is set to launch its detachable camera lenses. The lens will function independently without anything to support it. The lenses are big, self-supporting and have features which include built-in sensor, power source and Wi-Fi connectivity. You can strap it on to a smartphone and, so long as you are within the Wi-Fi range, your phone can act as a live viewfinder and take photos.

Now Smartphone Apps to Help You Find a Job

It is not an easy task to find a new job, but the task can become less cumbersome with a wide range of smartphone and web apps, specifically designed to customise your employment searches. Get hold of free apps such as SimplyHired, Indeed and Monster, for their iPhone and Android devices. They can display job opportunities with keyword search feature.

Ministry of External Affairs to Launch Mobile App

The Ministry of External Affairs (MEA) will introduce a smartphone application soon to notify users about its services. The app will enable the ministry to keep the users updated on activities on the diplomacy front and will inform the users of all citizen-centric services of the MEA such as passport, visa for those travelling to India along with Haj-related details.

Dell Brings Android Computer You Can Carry in Your Pocket

Dell's latest project codenamed as Ophelia is making a lot of news these days. Ophelia becomes a fully functioning Android OS-based computer when it is plugged in to an HDMI port. Which means that now you can carry your games, movies and files with you and enjoy them easily anywhere.

Full HD Display LG G2 Smartphone

The G2 smartphone comes with new graphic RAM technology and quad-core Qualcomm Snapdragon 800

The much-awaited new flagship LG G2 smartphone has finally been launched. The new smartphone brings along a host of improvements as well as upgrades, putting it directly in competition with the likes of Galaxy S4 and HTC One.

As per LG, the phone comes with a 13.2cm (5.2-inch) full HD true IPS display with 1920x1080 pixel resolution, and is backed by Qualcomm's Snapdragon 800 quad-core processor, the 'best' smartphone SoC in the market as of now.

As was widely reported, the volume rocker and power button are on the back of the smartphone. Falling right below is the 13MP camera with optical image stabilisation to click better photos in low-light conditions. The company also stated that the power

button could also be used as a quick launch button for the camera app. There is an LED flash and auto focus to aid better images. By default, the camera can record full 1080p HD videos.

The 2GB LPDDR3 RAM device runs Android 4.2.2 along with the company's custom user interface. The phone boasts of a host of software like Answer Me, Plug & Pop, Text Link, QuickRemote, Slide Aside, and Guest Mode.

New Series of Toshiba Laptops

Toshiba has unveiled a new exciting range of laptops for the Indian market

Toshiba has launched a new range of laptops in India. The introduction of these new laptops includes two lineups. These are the Satellite P Series and the Satellite S Series. Besides this, Toshiba also revealed its new Satellite L and Satellite C Series of mid-range and entry-level laptops.

The Satellite P series features a 'smart' silver finish and Harman/Kardon speakers. Two new notebooks are part of this lineup that comes with chrome accents on the lid. The Satellite P50 has a slim profile and allows users to make a choice between the Intel Core i3-3227U 1.9GHz processor (3MB cache), priced at ₹ 39,831 and Intel Core i5-3337U 1.8GHz processor with turbo boost technology,

priced at ₹ 47,117.

Satellite S Series comes with big screen devices and is available in 39.6cm (15.6-inch) HD clear Super-View LED backlit display and 16:9 aspect ratio. It features a brushed metallic ice silver finish and is thinner than 24 mm. It has the Onkyo speakers and caters to a host of multimedia requirements.

The 35.6cm (14-inch) Satellite L series comes in a brushed silky blue variant that features Intel Core i5-3337U processor 1.8 GHz with turbo boost technology. Whereas the Satellite C series offers users a wide range of features including the option to choose a laptop with touchscreen with 10-finger support, anti-finger print coating and choice of colours.

Price: ₹ 39,831 and ₹ 47,117
