

Know More About Digital Signal Processing

With the latest developments in technology and the high usage of computers, the need for digital signal processing has increased in the recent past. Here are a few websites that will help you enhance your knowledge on the subject

npTEL.iitm.ac.in

NPTEL or the National Programme on Technology Enhanced Learning is a joint initiative of the IITs and IISc. NPTEL provides e-learning through online video courses in the engineering, science and humanities streams. NPTEL's mission is to enhance the quality of engineering education in the country by providing free online courseware. The content on the site is distributed under the Creative Commons Attribution-NonCommercial-ShareAlike - CC BY-NC-SA. Apart from hundreds of different courses, the website has 43 video lectures on digital signal processing (DSP). It covers most of the topics that you need to know about digital signal processing.

arrl.org

Founded in 1914 by Hiram Percy Maxim, the American Radio Relay League (ARRL) is the national association for amateur radio in the US. Today, with more than 160,000 members, ARRL is the largest organisation of radio amateurs in the world. The website has a section with tutorials on DSP. It also has Web links to other free resources on learning and understanding DSP.

dspguide.com

This is an e-book that serves as a scientists' and engineers' guide to digital signal processing. The e-book has been authored by Steven W. Smith, Ph.D. He specialises in developing novel imaging systems for medical, security and industrial applications. The site contains 34 chapters, comments and feedback from the users, free software and teaching aids.

DSPRelated.com

The site has been around since 1999 and, over the years, has become the most popular independent Internet resource for DSP engineers around the world. It has a link to everything that you want to know about DSP.

dspguru.com

dspGuru provides a wide variety of information on DSP to help you master this complex domain. You can browse through FAQs on common topics, tutorials, how-tos, tricks, books, references and blogs by creating a login for the website to enhance your knowledge. dspGuru is and always has been a community effort and allows you to contribute articles that get published on the website.
