

Indian LED lighting market to touch US\$ 1279 mn by 2018

With the recent Central government efforts to promote manufacture of LED lighting products in India, the industry expects a significant growth in the LED market in the next five years.

"Due to the Central government and other state government efforts to boost LED manufacturing in the country, we expect the India LED market to grow from the current US\$ 143 million to US\$ 1279 million by 2018," said V.G. Ramakrishnan, managing director, South Asia, Frost & Sullivan. He said, the global penetration of Indian LED products will also grow from the current 4 per cent to 35 per cent in the next five years.

India backs off from US-led electronics trade pact

India will not be a part of a US-backed trade pact permitting duty-free trade of consumer products like mobiles, tablets and LCDs in its member countries.

India's refusal has come soon after US accused China for not agreeing to continue dialogues that could have led to the expansion of the 1996 Information Technology Agreement (ITA), supported by US and the European Union. The talks to expand the list of products that can be traded duty-free will reportedly resume in September.

India-Nigeria join hands for solar power project

India has signed an agreement with Nigeria wherein a series of solar power plants would be set up in the Niger state. The agreement was signed between Sutanu Behuria, the secretary to
