Optical image stabiliser driver IC for smartphones

Renesas Electronics Corporation, a premier supplier of advanced semiconductor solutions, has launched RAA305170GBM, an optical image stabiliser (OIS) control driver IC for use in camera-equipped mobile phones and tablet PCs. The RAA305170GBM is the first OIS driver IC available with the three systems of sensor/driver circuits for smartphones, raising the performance of functions such as image stabilisation AF.

With the RAA305170GBM, product developers can bring high performance on par with that of standalone digital cameras to the smartphones or tablet PC camera modules. This level of performance allows smartphones and PCs to meet general consumer demand for camera functionality that enables them to capture high-quality video and still photos without ever missing a good shot, while uploading these videos and still photos to the web immediately without any need for image processing.

32-bit microcontroller

Nuvoton Technology Corporation has launched the new member of NuMicro microcontroller family M058S series, the ARM Cortex-M0 32-bit microcontroller built based on the success of the popular Mini51 series.

In addition to providing all the features from Mini51 and M051, the

M058S upgrades the system frequency from 24 MHz to 50 MHz, offers built-in 8-channel, 12-bit A/D with I/O expanded to 55 pins, enhances Mini51 and M051 series in the I/O requirements and provides three kinds of packaging: QFN33, LQFP48 and LQFP64, wherein LQFP48 and QFN33 are pin compatible with the Mini51 and M051 series.

The M058S series operates at 2.5 V to 5.5 V, 40 to 85°C, and features up to 55 I/Os with functions of some pins shared, fast 12-bit A/D, 16-bit PWM, built-in high precision RC oscillator, 32-bit multiplier, structure NVIC (nested interrupt control), 32 kbytes Flash ROM, 4 kbytes ISP ROM and 2 kbytes SRAM; the peripheral integrates one UART, one SPI, two I²C, four 32-bit timers, WDT, low-voltage reset and brown-out detection.

TEST & MEASUREMENT

Dual measurement multimeter

GW INSTEK has launched dual-measurement multimeter, GDM-834x series, which has two models—GDM-8341 and GDM-8342. Its features include

50,000 counts, VFD dual-display, 0.02 per cent basic DC voltage accuracy and a USB protocol connector to provide users with measurement precision, lucid data observation, and the convenience to connect with the personal computer.

The GDM-834x series not only supports the fundamental measurement items provided by general multimeters but also equips with capacitance and temperature measurement functions. Furthermore, it provides many aux-

iliary functions to meet the measurement requirements for manufacturing process tests, educational experiments and testing facilities.

A meter for generator industry

ElMeasure has launched in the Indian market Gen Duos, a genset meter. The product has a dual display and monitors five key electrical parameters of

the genset, thus eliminating use of multiple meters, thereby reducing cost and simplifying the wiring.

It continuously displays the kWh parameter along with user-chosen voltage or amps or Hz. The kWh display is 6½-digit non-resettable stepper counter and the VAF display is a 4-digit bright LED. The meter is programmable for three-phase and single-phase applications.

TOOLS & EQUIPMENT

Energy harvesting solution kit

Energy Micro, Linear Technology and Würth Elektronik, leading manufacturers of energy-efficient active and passive electronic components, have recently launched an 'Energy Harvesting Solution To Go' kit, which provides an easy access to energy harvesting technologies to the develop-
