

Smarter cores. Smarter bodies.

Next-generation Renesas RL78/F12 16-bit MCUs realise low power consumption and high performance for a wide-ranging automotive body control applications, including lighting module, power window, wiper and remote keyless entry. Features like watchdog timer, ADC operation and data flash help you build compact and energy-efficient systems at lower total cost.

Advanced features

■ RL78 16-bit MCUs

- Up to 32 MHz
- 20-64 pins
- Data Flash
- Array of 16 bit Timer
- A/D converter
- LIN interface
- 1.8-5.5V, -40 to 125 °C operation

■ True low power

- Built-in energy saving "SNOOZE" mode
- No need to wake up CPU for receiving data
- A/D conversions and serial data input whilst in standby modes

■ Support functional safety

- On-chip A/D converter testing function and RAM guard

Applications

- High-intensity discharge lighting system
- Power window
- Wiper
- Power slide door
- Remote keyless entry
- Air conditioning
