

Know Analyze & Manage Power with.....

MPQ 3033

Power Quality Analyzer

Call
for Free Demo
1800 233 7766

FEATURES:

- ▶ Very easy to use along with color LCD touch screen
- ▶ Useful for 3 ϕ 4 wire / 3 ϕ 3 wire systems
- ▶ Measurement of Voltage, Current, Frequency, Active Power, Apparent Power, Reactive Power, Power Factor, Harmonics upto 50th order along with THD, Unbalances
- ▶ Facility to analyze the Dips and swells, Flickers, Inrush current
- ▶ Maximum recording time upto 960 hours
- ▶ Digital oscilloscope facility to view voltage and current waveforms
- ▶ Operates on Mains & Rechargeable battery
- ▶ User friendly software for analysis & report generation

Motwane the pioneers in test & measurement field has introduced MPQ 3033 the Power Quality Analyzer, as a useful tool for preventive & predictive maintenance of power supply. MPQ 3033 facilitates to measure Harmonics, Power, Energy, Power Factor, Flickers, Unbalance, Volt-Amps-Freq-Crest Factor, Dips and Swells, Inrush currents. The instrument is suitable for the Energy auditors, Maintenance personals of utilities & OEMs, large scale industries.
