

allow unnecessary portions to reside in memory.

3. The opening of the textual and structural components of a file have been decoupled. In the new release, the textual element of the file is immediately displayed in the editor. Meanwhile, a background thread works on any required parsing tasks to obtain the structural element of the file.

According to the developer, this strategy would allow important new functionality to be introduced and evaluated, while still admitting daily users of SVEditor to continue to utilise the stable release.

What's new in SVEditor 1.2.8

1. An issue that resulted in certain operators not being correctly coloured in the editor was corrected. Operator lists were stored in different places in the code, but now all the operators are

listed in the SVOperators class.

2. An off-by-one line numbering issue with the Argument File editor was corrected. This issue caused errors to be annotated one line off from where they should have been positioned.

3. There is now an enhanced argument-file editor to react to resource-variable changes.

4. A build issue with the 1.2.7 version, which caused the template-instantiation wizard not to load, has been corrected.

5. Support has been enhanced for editing files (that were not a part of an index), but within a project where configuration of indexed files occurs. This happens frequently, for example, when a new file is added to a project. With these enhancements, macro-definitions are pulled from the project's index.

6. A bug that involved 'selected-word highlighting' for words contain-

ing regular-expression character was corrected.

7. A bug that involved 'first_match' in an assertion was corrected.

8. A bug that involved 'within' being used within an assertion was corrected.

The future of SVEditor

There are many helpful features that developers would want to add to SVEditor. These include:

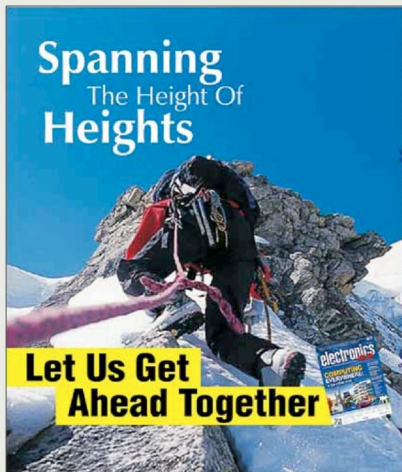

1. Locating references in the project sources to classes, methods, fields, etc.

2. Re-factoring support – renaming classes, methods, etc.

3. A more detailed analysis of the source structure.

4. Support for large design descriptions and the test bench.

5. Further distinguishing the task of editing from parsing the source structure. ●

Tell Me More About Advertising Opportunities in EFY Magazine

I am aware that EFY Magazine presents umpteen advertising opportunities. I too would like to explore the various options available for my organisation, so that I can help it grow in terms of sales and brand presence. My details are mentioned below:

Name _____
 Organisation _____
 Designation _____
 Address _____
 City _____ Pincode _____
 Phone _____ Fax _____
 E-mail _____

I would like to have a one-to-one meeting

☐ I would like to have a one-to-one meeting with someone from the EFY team.

☐ Please send me your marketing kit containing all necessary details.

Please mail/fax this form to:

EFY Enterprises Pvt Ltd

D-87/1, Okhla Industrial Area, Phase-I, New Delhi 110020
 Tel: 011-26810601/2/3; Fax: 011-26817563
