

Fast Retrieval, Precision Measurement

GDS-2000E Series Digital Storage Oscilloscope

The GDS-2000E Series digital oscilloscope allows users to easily and completely observe inrush signals and rare transient waveforms to increase waveform debugging efficiency by using features, including advanced VPO (Visual Persistence Oscilloscope) signal processing technology, waveform update rate as high as 120,000 wfms/s, and multi-layered afterglow display to enhance waveform display efficiency.

The GDS-2000E Series soundly provides 36 measurement items. On the single display screen, the GDS-2000E Series provides 8 measurement selections. The statistics mode can also be selected for users to analyze the mean value, the maximum, the minimum, and standard deviation of the retrieved waveforms to ensure signal's integrity and identify abnormal waveforms.
