

more locations more flexibility more control

Traditionally in business, more locations has always meant lesser control. Not any more. Because there is hardly anything traditional about the futuristic COSEC range of Access Control and Time-Attendance solutions from Matrix. These technological workhorses perform seamlessly across multiple locations - removing all barriers of size, time and distance. They integrate biometrics with RF cards and are engineered to adapt to current and future organisational needs. Thus it is no surprise that Matrix COSEC has been chosen by progressive organisations like Adani, Gujarat Ambuja Exports, Real Image, Sterling and Wilson, Gold's Gym, Gruh Finance and MRF Tyres.
