

# Do-It-Yourself

Trying out different experiments has always been fun and satisfying for a hobbyist. This month we have listed out some websites that could help you try your hands on different do-it-yourself (DIY) projects

**NIRAJ SAHAY**

## doityourself.com

*doityourself.com*, founded in 1995, is an independent home improvement and repair website. It is divided into three sections: How-Tos, Forums and Did It Myself. Did It Myself section has projects on various topics. The website also includes a section called Electrical & Electronics. You may access this site freely and use it for non-commercial purposes, subject to terms and conditions. Today, *doityourself.com* averages over five million unique visitors per month.

## fixya.com

This site has a solution for nearly everything. In 2005, many product manufacturers were neglecting post-purchase customer support. Frustrated by the lack of practical post-purchase information, entrepreneur Yaniv Bensadon set out to build a community resource capable of providing relevant and up-to-date data for troubleshooting. Today, fixya continues to empower individuals to repair and improve upon their already-purchased possessions. From fixing cars to cameras and iPhones, fixyans are part of a DIY revolution that helps empower techies, tinkers and hobbyists across the globe.

## fastrepairguide.com

This is the place where you can find online computer and electronics repair guides. The site provides repair and troubleshooting information for devices ranging from LCD monitors and computer motherboards to inverters and printers. It also provides links to electronics projects and components' datasheets. *fastrepairguide.com* has about 13,215 users in its online community and is one of the most popular websites in the city of Ipoh, Malaysia, according to *alexa.com*, with maximum search queries related to LCD and plasma TV repair.

## electronics-diy.com

The site allows you to contribute DIY electronics projects. It has many projects spread across different sections, namely, Electronic Store, Electronic Blog, Electronic Schematics and Tutorials. The last section contains tutorials on PIC microcontrollers, EAGLE printed circuit boards (PCBs) and on how to make PCBs, among others. Overall, it is a great place for a hobbyist to learn and contribute.
