Intex launches full-HD LED TV

A colourful companion for everyone

The 53.3cm (21-inch) LED TV (LED-2111 FHD) from Intex features a native resolution of 1920x1080 pixels, DLED LED type, smart power saving, built-in stereo speaker (to produce balanced stereo sound over a wide area) and digital noise reduction. It eliminates lag, ensures faster response time and better viewing experience without straining the eyes.

It uses Eye Safe-T Matrix Technology, a path-breaking innovation that blends the uniqueness of technology and glass substrates. The technology incorporates Advanced Plane Switching (that helps correct pixel orientation on the LCD screen, deliver a wider viewing angle, great colour fidelity with least colour shift and save energy), Copper Bus Line Technology (that enhances

colour quality for the video, graphics and everyday applications and uses lower-resistance material for faster and brighter transmission of signal), Over Driving Circuit (that eliminates blur and facilitates a faster full-white to black transition) and Column Spacer Technology (that gives the screen improved picture quality free of ripples and ensures improved contrast ratio).

Zebronics unveils Iron Head headphones

For long-wearing comfort

Iron Head headphones deliver astounding sonic depth, creating a virtual world through simulated 3D surround sound. These headphones feature easily-adjustable, padded headbands with extra cushioning on the ear pieces for long gaming and movie sessions. The directional boom microphone filters out background noises, delivering clear voice signals for all users.

The control pod is solidly-built with easy-to-use buttons for volume up, volume down, mute and mic mute. The headphones also come with a long-lasting sleeved cable measuring three metres, USB interface and built-in audio processor.
