Google launches News Lab

The search giant has announced Google News Lab, a website for journalists. With an aim to help them to create their own stories, the Lab provides various tools along with tutorials to teach them how to use online tools like Google Alerts, Google News and Google Trends. By using news outlets like First Draft, YouTube, Newswire and WITNESS Media Lab, Google News Lab also motivates eyewitness citizen journalism.

Truecaller introduces Truemessenger

Swedish firm Truecaller has introduced a new app called Truemessenger for verifying senders of SMSes. Just like Truecaller app, data is obtained from the contact list of users of the application, which enables them to identify spam SMSes.

Microsoft launches Office for Android

Microsoft has brought its popular Microsoft Office software to Android devices. This would allow users to work on documents using Word, Excel and PowerPoint while on the go.

HomeLane launches Kaleido VR headset

HomeLane, a Bengaluru based start-up, which deals with interior designing, modular kitchen manufacturing and 3D modelling, has launched a new virtual reality (VR) based device called Kaleido, powered by Google Cardboard. Kaleido can be worn to watch different finishes, flooring options, accessories and appliances, in different combinations, making it simpler for users to make an informed decision.

Splendo PC stick from iBall, Microsoft

For a complete Windows PC experience

iBall Splendo is a compact device that can fit neatly into a pocket. It is powered by Intel Atom quad-core processor, runs Windows 8.1 and features 2GB RAM with 32GB inbuilt memory. When connected to a television, through the HDMI male plug, it can turn the television into a personal computer (PC), complete with features like HD graphics, multichannel digital audio, micro SDXC slot, normal USB port, micro-USB port, Wi-Fi and inbuilt Bluetooth 4.0.

The device features a fan-less design. The fully-functional PC setup can be used for tasks like checking emails and document editing. Because of its small size, it is portable and can be carried along while travelling as a replacement to the laptop. It can also be used for entertainment purposes, surfing the Internet, browsing photos and playing games.
