

Toshiba SLC NAND Flash Memory

Single Level Cell (SLC) NAND Flash Memory

Is a high reliability high performance embedded NAND flash memory device used for code and data storage. Toshiba offers SLC NAND flash memory products in a wide range of densities and multiple package options to meet the diverse requirements of the embedded market. Toshiba's SLC NAND is used in a wide range of consumer and industrial applications today because of their faster read and write performance, large number of write/erase cycles endurance and also excellent reliability.

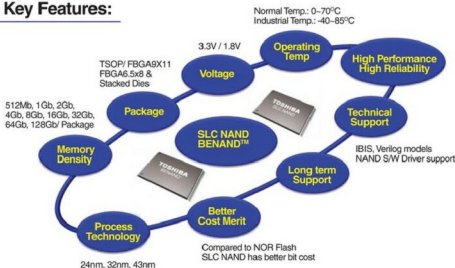

Toshiba SLC NAND Line up :

Toshiba's SLC NAND lineup includes two category of products.

*BENAND™ : Built-in ECC NAND
BENAND™ is a trademark of Toshiba Corporation.

SLC NAND Key Features:

Toshiba Corporation, and its subsidiaries and affiliates (collectively "Toshiba"), reserve the right to make changes to the information in its document, and related hardware, software and systems (collectively "Product") without notice.

For further detailed information, please visit Toshiba SLCNAND product web page:

Key Applications :

Key applications include Mobile phones, Set-top box (STB), Digital TVs (DTV), Digital Still Cameras (DSC), Industrial Automation, Robotics, Compact Flash (CF) Cards, SSD Modules, POS Terminals, and a wide range of other consumer and industrial embedded applications.
