

Aplab

'Make in India' since 53 Years

APLAB helps to make Automation

Reliable and Enduring Automation needs reliable hardware and user friendly software embedded into the end user product. Good and reliable quality of power solution from Aplab and dove-tailed embedded SW from Aplab's Soft Subsidiary, SPRYLOGIC has helped our customers to have remarkable market success.

Embedded Power Systems

APLAB is the Source of embedded power supply solutions to many reputed manufacturers of user terminals, scientific instruments, industrial systems, self-service terminals, automatic dispensers, machines etc. We provide custom designed power using AC/DC, DC/DC, DC/AC power converter topologies to meet demanding operating conditions. Aplab provides solution that integrates with their design in terms of electrical, mechanical and aesthetic compatibility.

Come to us with your problem for a well structured solution.
