PM launches flexible electronics centre at IIT Kanpur

A flexible electronic centre worth ₹ 1330 million is being set up at IIT Kanpur. This is a first-of-its-kind facility across IITs, aimed at pioneering new flexible electronics domain. Department of Electronics and Information Technology (DeIT), government of India, is assisting IIT Kanpur in this project.

Renesas Electronics to deliver IoT platform

Renesas has announced Renesas Synergy Platform, a new, easy-to-use, qualified platform designed to accelerate time-to-market, reduce total cost of ownership and remove many obstacles that engineers face as they develop products for the growing IoT and industrial markets. The platform uses an innovative approach to new product design that lets embedded systems engineers start product development at API level, giving

them more time to design innovative and differentiated features.

Cisco launches IoT system for enterprises and smartcities

Tech giant Cisco has introduced Internet of Things (IoT) system, under which it has launched 15 products. This system encompasses all parts of the infrastructure that go into IoT deployment, which include communications gear, computing elements, security and management software.

Synopsys to increase footprint in India

Synopsys India, a part of the electronic design automation (EDA) conglomerate Synopsys Inc., is planning to collaborate with small semiconductor design companies in order to expand its footprint in India. Besides partnering with local players, the company will continue to collaborate with tech giants such as Intel, Qualcomm, Texas Instruments, Brocade and Freescale for EDA and software capabilities.

manufactured at this plant will be feature phones and the remaining 40 per cent will be smartphones.

Foxconn to set up 12 manufacturing units in Sri City

Foxconn, the largest contract manufacturer of phones/gadgets and hardware globally, has zeroed in on Sri City in Andhra Pradesh to set up a manufacturing facility.

The Taiwanese giant is planning to set up several units in the country

involving significant investments. Foxconn CEO has indicated plans to set up ten to twelve manufacturing units and possibly create one million jobs by 2020. Initial focus will be on Gujarat and Maharashtra, besides Andhra Pradesh.

Foxconn is also looking to set up data centres and invest in start-ups.

Chinese mobile phone companies like Xiaomi and Gionee are among those that have outlined plans for manufacturing in India and they are expected to team up with Foxconn.

Crompton Greaves, SOGO to sell kitchen appliances in India

Crompton Greaves has signed a long-term alliance pact with Spanish European consumer appliances company SOGO to sell kitchen appliances in India.

SOGO is engaged in the marketing and worldwide sales of kitchen and home appliances and personal care products. It will provide market intelligence and access to its international design houses to develop unique products for the Indian consumer.

Through this alliance, Crompton will leverage SOGO's robust cost-effective supply chain to introduce the new range of products through its well-established distribution network with a target of reaching 9000 premium retail counters. The high volume procurement projected will enable both companies to achieve higher competitiveness.

Japan's Komamura keen to make lenses, cameras in India

Japan's Komamura Corp. is looking to make lenses and cameras in India and would explore the possibility of setting up operations in Andhra Pradesh in this regard.

The company is also exploring the possibility of exporting its equipment to other parts of the world from Andhra Pradesh.

Komamura operates in the optics space and manufactures view/technical cameras, pro-digital photo equipment and pro-broadcasting equipment.

Celkon rolls out manufacturing unit in Telangana

Hyderabad based mobile phone company, Celkon, has announced the launch of its first manufacturing unit in Telangana. Until now, its mobiles and tablet PCs were assembled in Taiwan and China.

According to reports, the unit has the capacity to manufacture 200,000 phones per month, and this will be increased to 500,000 phones per month in the next quarter. Also, about 60 per cent of the phones
