## Make it super thin

Make magic with plastics

Thinner. Lighter. How ambitious are you for your next phone, tablet or ultrabook? Now you can design parts and components as thin as 0.1mm, and they will be rigid and durable. High flow plastics from DSM, outperform every benchmark. We work with designers and engineers at the world's leading mobile brands to create the next generation devices. They challenge us to make their designs for frames, enclosures, antennas, connectors (e.g. audio jack, USB Type-C) and cables possible with plastic. We innovate advanced plastics and work with the component manufacturers to turn their design vision into reality. What's possible for your next device? Make it thinner. Stronger. Without harmful substances. Contact your local DSM expert and share your challenge.
