

INTERNET OF THINGS

iotshow.in

January 11th-13th, 2016

Bangalore International Exhibition Centre (BIEC), Bengaluru

India's first mega event for all the stake-holders of Internet of Things ecosystem to come together.

Panel Discussions

Standardisation for the IOT Ecosystem: An enabler or a roadblock?

Moderated by Narang N Kishor,
convener of panel by Bureau of Indian
Standards for Smart Infrastructure

Security of Things: How can we really make Internet of Things secure?

Moderated by Rishi Brathagar,
Target Accelerator

Key Speakers

Vinay Chaddha
CEO, GVC Systems

Martin Woolley
Technical Program Manager,
Bluetooth SIG

Narang N Kishor
Convener of panel by BIS for
Smart Infrastructure

Nimesh Deshpande
Ethereal Power's
Standardisation Group

Shreshth Pauer
CMO, Clever Medical
India Pvt Ltd

Dr. Srinivas Mandavilli
Country Manager,
Imagination Technologies

Srinivasa Moorthy
CEO, Andhra Pradesh
Electronics & IT Agency

Syam Madanapalli
CTM, Ram Technologies

Hemant Karnat
CTO, Shalaka Technologies

Yaping Tseng
CTO, ThroughTek

Smart Humans

Nanotech sensors for Human Body Health Monitoring

Dr Vijay Mishra, CTO, CeNSE - IISc

How to build a device that keeps the doctor away

Srinivasa Moorthy, CEO, Andhra Pradesh Electronics & IT Agency

Creating the edge tier of the Internet of Things

Martin Woolley, Technical Program Manager,
Bluetooth SIG

- Hardware is Hard! Here's how to solve through Indian Manufacturing Challenges
- How we developed a wearable at IISc, for remote monitoring of newborns
- How to take your medical device from idea to regulatory approved product

Smart Automotive

How we use V2V and V2X to make smarter cars

Sofia Sekar and team, Mercedes Benz Research

Threat perception and attack scenarios in Automotive

Dr. SK Sinha, CEDT, IISc

The mistakes I have made building ADAS, And How You Can Learn From Them

Plato Patroze, System Engineer Lead, Magna
Electronics, Germany

- "Deep Learning": Deep dive into large data
- Introduction to Device Tree for automotive engineers

Workshops

- Quickly designing better hardware using COTS
- Design & Fabrication of an ECU for power window lifter
- Integrating off-the-shelf components to the cloud
- Security, Surveillance & Monitoring: The right way to do it
- How to build a smart aquarium maintenance system
- Building Industrial IoT Devices 101

Smart Industry & Office

Building Secure, Flexible IoT Platforms

Dr. Srinivas Mandavilli, Country Manager, Imagination
Technologies

How to integrate Industrial IoT with manufactur- ing systems

Hemant Karnat, CTO, Shalaka Technologies

Building Industrial IoT Devices That Sell (Learning from experience)

Vinay Chaddha, CEO, GVC Systems

- How to achieve real time, deterministic, redundant and safe communication on Ethernet using open source POWERLINK
- How to take your industrial IoT device from Prototype to product
- Making sense out of sensor data

Smart Cities & Homes

How ecosystem principles can help us build smarter homes

Yaping Tseng, ThroughTek

Building Smart Cities with Everything as a service

Syam Madanapalli, CTM, iRam Technologies

Solving imaging challenges for smart home market

Ting Zhou, Omnivision Technologies

- Building a smart home using renewable energy micro-grid with existing infrastructure
- Idea to production: Building your first minimum viable product for smarter homes
- How to use HomeKit and AWS IoT to develop smart and connected appliances
