

Ideal Equipment for Low-Resistance Measurement

40th ANNIVERSARY
The hallmark of GW Instek for 40 years.

GOM-804/805 D.C. Milliohm Meter

GW Instek launch a new series of D.C. milliohm meter - GOM-804/805, which abundantly feature 3.5-inch TFT display, maximum 50,000 counts measurement display, the rapid sampling rate of 60 readings per second, optimum 0.05% measurement precision, four wire measurement method as well as the temperature measurement and temperature compensation measurement function to meet the requirement of low resistance measurement application. The GOM-805 also includes various drive modes and Dry circuit for contact resistance measurement applications. More features, including 20 sets of panel setting memory and many external control interface such as RS-232C, USB, Handler/Scan/EXT IO or GPIB (option), greatly elevate GOM-804/805 milliohm meter's convenience on practical applications.

- 50,000 Counts Display
- 3.5" (320 x 240) TFT LCD Display
- High Accuracy of 0.05% Precision
- 1Amp Test Current, 1μΩ Resolution
- Fast Measurement of 60 Readings Per Second
- Four wire Resistance Measurement
- Temperature Compensation Measurement Function
- Delayed Measurement
- 20 sets of Panel Setting Memory
- Dry Circuit (GOM-805 Only)
- Drive Modes : DC+/DC-, Pulsed, PWM, Zero(GOM-805 Only)
- Interface : USB Device, RS-232C, Handler/Scan/EXT I/O, and GPIB(Optional)

DRY CIRCUIT TEST (for GOM-805 only)

VARIOUS DRIVE MODES (for GOM-805 only)
