COMPONENTS

UHD chip

Based on DLP CinemaR technology, the DLP 4K ultra-high-definition (UHD) chipset combines fast switching speed of the digital micromirror device with advanced image processing. It is offered in a single-chip projector architecture that enables high-resolution and high-brightness solutions.

The DLP 4K UHD solution uses the fast speed of the chip with advanced image processing to deliver more than eight million pixels to the screen with just four million mirrors.

AC-DC front-end modules

Vicor has announced an addition to its new family of high-density PFM AC-DC front-end modules in the rugged VIA package that offers superior cooling performance and versatility in converter mounting. Featuring a universal AC input range (85V AC - 264V AC), power factor correction and a fully-isolated 24V DC or 48V DC output, and delivering 400W of isolated, regulated, DC output power at efficiencies up to 93 per cent, these new modules provide unprecedented power density of 8W/cm³ (127W/in³) and best-in-class performance in a diminutive, 9mm thin VIA package.

Chip capacitors

SMC Electronics provides a range of SMD parts including multi-layer chip capacitors for use in consumer electronics, telecommunications, data processing, PCs and other applications.

All capacitors meet or exceed EIA 535 BAAC and IECQ standards.

The chip capacitors can be used for different temperature characteristics having capacitance range of 0.5pF to 100µF, voltage range from 4kV DC - 5kV DC and operating temperature range from -55°C to +125°C.

Constant-current driver IC

Key features of this product are:

- Non-isolated buck topology
- Active power factor correction, PF > 0.9, THD < 10 per cent
- Direct supply technology (no Vcc supply circuits)
- Good line regulation and load regulation
- Cycle-by-cycle current limiting
- Output short/open-circuit protection
- Over-temperature protection

T&M

Pulse ox and heart rate monitor module

MAX30102 is an integrated pulse oximetry and heart-rate monitor module. It includes internal LEDs, photodetectors, optical elements and low-noise electronics with ambient light rejection. It provides a complete system solution to ease the design-in process for mobile and wearable devices.

MAX30102 operates on a single

1.8V power supply and a separate 5.0V power supply for internal LEDs. Communication is through a standard I2C-compatible interface.

Digital multimeter-cum-insulation tester

FLIR IM75 is both an advanced multifunction digital multimeter and handheld insulation tester for installation, troubleshooting and maintenance professionals. It includes several specialty insulation modes including polarisation index, dielectric absorption and Earth bond resistance. Insulation tests can be performed instantly, continuously and over a timed duration for in-depth assessment.

Spectrum analyser

R&S Spectrum Rider is the new handheld spectrum

analyser that has a modern and intuitive look and feel. Having state-of-art design and implementing latest design methodology, Spectrum Rider has better RF performance coupled with comprehensive features and benefits to address the needs of various market segments.
