Planning to buy a 127cm (50-inch) flat-panel TV? Look no further. In this article we explain some important things a consumer needs to look for while choosing such a high-end device.

The wide-display TV market is growing at a significant pace with the arrival of new and better technologies like LED and frequent launches of advanced and improved products.

According to 'Indian Television Market Outlook 2015,' increasing income levels of Indian consumers, easy availability of financing options and growing awareness about innovative technologies have been the main driving factors for growth in this segment.

Some are smart TVs that are available across various operating systems; Samsung operates on Tizen, Sony on Android and LG on Web-OS.

Online versus offline

Along with conventional electronic re-

tail outlets, online retail chains such as Amazon, eBay, Homeshop18, Snapdeal and Flipkart are mediums where consumers can conveniently place orders through websites or mobile based applications. These retail channels have been dominating consumer demands owing to the busier lifestyles of people and the benefit of comfort provided by these online sales portals.

However, according to our research, even though people usually get comparatively lower prices while buying from online retail chains as compared to physical stores, some prefer buying from reputable consumer electronics stores for better customer service experience and satisfaction.

Described below are some tips that must be kept in mind while buying a 127cm flat-panel TV.

LED, LCD or plasma

Confused between LCD, LED or plasma? Let us try and explain the differences between these.
