

Innovation Everywhere

Digital Position Sensor ICs

Hall-effect digital position sensor ICs detect movement and position via changes in magnetic flux density. Allegro is the market leader in magnetic sensor ICs* with one of the industry's broadest portfolios of switch, latch, and speed & direction ICs. They are contactless, require few external components, and are AEC-Q100 qualified.

We continue to add new and exciting products:

- **Vertical Hall** sensing enables new, smaller, lower-cost system form-factors and revolutionizes motors/encoders, delivering quadrature signals independent of magnet pitch.
- Allegro-developed **packaging** integrates the typical discrete components for **improved EMC** performance and **PCB-less** sensor implementations.
- Patented **self-test** features for safety-critical systems required to meet **ISO 26262 (ASIL)** guidelines.
