

Business Events at IEW 2016

CEO Summit

Put together with the help of ELCINA, the summit discourse was based on the theme 'Invest in India - The Multi-Billion-Dollar ESDM Opportunity.' It was graced by the presence of R.V. Deshpande, hon'ble minister of large- and medium-scale industries, government of Karnataka as chief guest, along with K. Ratnaprabha, additional chief secretary to government of Karnataka, Commerce and Industry Department, and Arun Sachdeva, senior director, DeitY, government of India, as guests of honour.

Senior-level speakers across the electronics industry such as Vikram Desai, president - ELCINA and MD, Desai Electronics, Vinod Sharma, MD, Deki Electronics Ltd, N. Ramachandran, MD, MEL Systems and Services, Sreeram Srinivasan, CEO, Syrma Technology, Prabhu P.M., MD, Bosch Automotive Electronics, Pankaj Gulati, VP - ELCINA and COO, CDIL, K.P. Sharma, India head - GSC, Schneider Electric and others discussed ways to boost investment in electronics manufacturing in India.

The summit also covered the need for investment and opportunities in the electronics industry for design and innovation. Richard Puthota, director, Cookson India, Vinay Shenoy, MD, Infineon Technologies, Anilkumar Muniswamy, MD, SLN Technologies, S.A. Srinivasa Moorthy, CEO, Andhra Pradesh Electronics, Dr Kumar Sivarajan, CTO, Tejas Networks, and Rajeev Ramachandra, CTO, Mistral Solution, presented their views on the same.

Role of infrastructure and low-cost finance to create the appropriate investment climate for the electronics industry in India was another interesting topic that was covered. T. Vasu, advisor - Tandon Group, and Subhash Goyal, MD, Digital Group and ex-president, ELCINA, discussed the importance of infrastructure and low-cost finance, while S. Thiruvadi, MD, CanBank Venture, and Anadi Charan Sahu, GM, SIDBI, shared valuable information on the availability of the same.

IET Conference

The IET hosted the first-of-its-kind conference in India that focused on ways to help start-ups and business enterprises to monetise the Internet of Things (IoT). Titled 'Simplifying the Puzzle: Generating Money in Internet of Things,' the event showcased success stories from industry experts who have exploited the monetary potential of the IoT. Futuristic trends, potential challenges and guidelines to implement IoT programmes were discussed in detail during the conference.

The conference also had two panel discussions on 'The IoT as a Thrust to Revenue Generation' and 'The IoT for Cost Optimisation to Margin Improvement' featuring panellists from companies like Aeris, Bosch, Credit Suisse, Cisco, Intel, Nokia, Qualcomm, Samsung and Vodafone.

LED Lighting Summit

With strong emphasis on energy-efficient lighting technology, the summit was co-organised by ELCOMA, the apex body of lighting manufacturers in India, and EFY. The conference brought together around 160 participants representing the entire cross-section and stake-holders in LED lighting, top LED lighting and component manufacturers, government end-users (leading municipalities), bulk buyers, regulatory and standardisation authorities, consultants, lighting architects, testing and certification bodies and so on.

Experts from the LED industry and government bodies discussed various business and technology trends. Shyam Sujan, secretary general, ELCOMA, Arun Sachdeva, senior director, DeitY, Shekhar Bajaj, CMD, Bajaj Electricals, and Ramesh Chopra, executive chairman, EFY Group, discussed the future of the LED industry.

Other interesting sessions included:

- LVDC: The Future of Electricity by Vimal Mahendru, president, Legrand, India
- LED, The Good and Not-So-Good Stories by Sudeshna Mukhopadhyay, senior director, Centre for competence, lighting applications and head of Philips Lighting Academy, Philips Lighting, South Asia
- LED: A journey from Lumen to Digital Lumen by S. Chakrabarty, VP, Luminaires BU, Bajaj Electrical Ltd
- LED Street Lights with Controls by Uma Lanka, DGM, design and business development, Crompton & Greaves
- Indian Standards on Lighting and Its Mandatory Implementation by Debdas Goswami, scientist-F and head-Bureau of Indian Standards (BIS)
- LED Market Trends and New Component Technology for the Future by Ita Lin, CEO, MLS India
- Government Procurement Programme for LED Streetlighting and DELP Programme for LED Lamps by Rajneesh Rana, DGM, Energy Efficiency Services Ltd (EESL)
- LED Indian Standards and Its Compliance by Puneet Randeo, business development head, UL India
- LED Photobiological Issues by K. Vijay Kumar Gupta, MD, Kwality Photonics Pvt Ltd

Get Funded

"For good ideas and true innovation, you need human interaction, conflict, argument and debate." This high-spirited slogan marked the outcome of Get Funded 2016 event. This get-together of innovators and investors marked the perfect platform for start-ups to find their calling and investors their prize. The over-crowded boardroom provided enough proof, and the event was tagged as one of the most interesting and creative ones in its segment.
