

Tech Events at IEW 2016

IoTShow.in

Winning the coveted 'People's Choice Event of the Year' award at the 5th annual Internet of Things Awards conducted by Postscapes, IoTShow.in was recognised as the event that has had the greatest impact worldwide on the IoT in 2015-16. The show saw more than 200 speakers discussing ways to develop viable IoT solutions, guiding and driving efforts to make sure that the IoT becomes a key part of modern business.

Hon'ble Janardhana Swamy, former MP, and Venugopal KR, IEEE fellow, provided the perfect start for eRocks and IoTShow.in by enthraling the audience with a glimpse into the future. The various sessions that followed focused on smart homes/smart cities, smart humans, smart industry and office and smart automation. There was at least one session in each track that discussed taking a prototype to a complete product.

Experts from across the globe came together for four panel discussions that saw them debating it out on stage, giving the audience a very realistic view of the behind the scene of a finished product.

Eminent personalities from hard-core standardisation committees participated in 'Standardisation for the IoT Ecosystem: An enabler? Or a roadblock?', which was moderated by Narang N. Kishor, convenor of the panel on smart infrastructure by BIS.

Tearing apart the notion of security in the IoT space was the panel discussion on 'Security of Things,' moderated by Rishi Gaurav Bhatnagar, a maker, Intel software innovator and Arduino maker fellow.

'Navigating the Hardware Start-Up Journey' brought much excitement among the masses in an age where start-ups are the order of the day. The discussion was conducted by Satish Mugulavalli, CEO, RevvX.

Take a look at some key sessions by star speakers.

- Martin Woolley from Bluetooth SIG delivered talks on Putting the Smart in SmartHome with Bluetooth and Bluetooth Beacon Applications and Real-World Developer Issues.
- Dr Vijay Mishra from IISc spoke about nanotech sensors for human body health monitoring.
- Threat Perception and Attack Scenarios in Automotive was handled by Dr. S.K. Sinha from IISc, while Prof. Bharadwaj Amrutur gave a talk on How We Developed a Wearable for Monitoring Newborns.
- How to Build a Device That Keeps the Doctor Away was the tip Srinivasa Moorthy, CEO, Andhra Pradesh Electronics & IT Agency, gave to young designers.
- Dr Srinivas Mandavilli, country manager, Imagination

Technologies, spoke extensively on Building Secure, Flexible IoT Platforms.

LED Tech Conference

Under the banner of LEDasia.in, IEW had an exclusive tech conference for the LED sector, where design challenges were tackled heads-on. Some topics of discussion were:

- Conformal Coatings: Why We Need These and How To Maximise Their Effectiveness by Phil Kinner, global business and technical director, Electrolube.
- Global Regulatory Compliance for LED Products by Kalyan Varma, VP - business stream products, TUV Rheinland
- Next-Generation LEDs for Outdoor/Industrial Lighting by Senthilkumar Madasamy, field applications manager - India, CREE India Pvt Ltd.

Makers in India

Put together by Makers Asylum, the sessions revolved around converting an innovative idea into a product, one that sells in the market. With talks and demos revolving around this theme, this track was, as the title says, for all makers in India. Well, it does not stop there.

T&M Showcase

Test and measurement (T&M) plays a critical role in the electronics industry. Equipped with an amazing line-up of presentations and equipment, presenters from various companies explained components and upgrades being applied in the industry. Overall, sessions enriched the audience and the Q/A sessions turned out to be quite interactive and informative.

IoTBLR Community Meet-up

Being held for the third consecutive year along with EFY conferences, the Bengaluru based IoT meet-up group explored how one could go from an IoT solution idea to product and then to market. There was also a session by Karnataka Information Technology Venture Capital Fund (KITVEN Fund) on how IoT/electronics hardware entrepreneurs in Karnataka can access the latest ₹ 1 billion KARSEMVEN fund.

IPC Workshop and Hand Soldering Competition

IPC India held a workshop on 'PCBs - Problems Coming Back?' Prof. Vidhu Mitter, an expert, discussed the reasons why problems come back, specifications and standards,
