

ROHM's Product Reliability

ROHM develops innovative, high-quality products designed to bring greater comfort and convenience while contributing to a sustainable society.

POWER DEVICE

Increasing efficiency in power generation systems and power supplies for improved energy creation and energy savings

- SiC Power Modules
- Gate Driver ICs
- High Voltage Power MOSFETs

IC SYNERGY

Fusing analog and digital IC technologies for greater performance

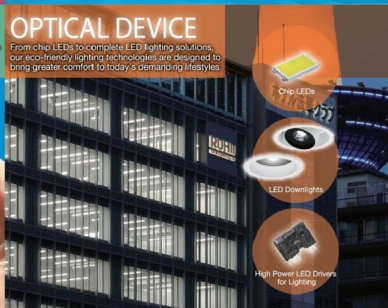

- Automotive-Grade IC Chips
- Input / Output Hub ICs
- Power Management ICs

SENSOR NETWORK

We offer a variety of sensing technologies applicable for a wide range of fields, from mobile devices to health & fitness equipment and even medical testing

- Accelerometers
- Optical Proximity Sensors
- Sensor Hub Low Power Microcontrollers

OPTICAL DEVICE

From chip LEDs to complete LED lighting solutions, our eco-friendly lighting technologies are designed to bring greater comfort to today's demanding lifestyles

- Chip LEDs
- LED Downlights
- High Power LED Drivers for Lighting

ICs 	Power 	Sensing 	Communications 	Discretes 	Optoelectronics 	Passives 	Modules 	LED Lighting
