

DOU YEE ENTERPRISES

Dou Yee Enterprises is the premier total industrial solutions provider in the Asia Pacific region, serving with distinction the semiconductor, data storage, electronics and biomedical industry since 1982. We have 39 international branch offices strategically located around the world to give customers the fastest and most accessible products and services. Our manufacturing plants, located in Singapore, Malaysia (Seremban), China (Suzhou) and France are governed by consistent quality systems with ISO 9001:2008 and ISO 14001:2004 certifications.

DRIVE TECHNOLOGIES

Drive Technologies has supplied world class equipment, materials and aids for the electronic industry in the field of circuit assembly, testing, cleaning and conformal coating. In the conformal coating space, the company ensures the right material at the right time with thorough technical backup. Based on these credentials, the company is trusted by numerous large and small scale companies in India. The conformal coating from HumiSeal is central to the company's future growth.

DS ELECTRONICS

DS Electronics was established in 1989, as a professional company engaged in marketing industrial components and allied products. The company has built a strong reputation among manufacturers and dealers all over India. With the eco-friendly movement gathering steam all over the world, the demand for energy-saving products for commercial LED lighting has grown, which led the firm to incorporate DS Lighting Technologies (a division of DS Electronics). The company succeeded in partnering with Taiwanese company, Prolight Opto Technology Corp, which offers LED products ranging from 0.2W to 200W.

DSQ TECHNOLOGY CO LTD

DSQ was founded in the year of 1988, by the founder Mr. Johnny Tseng--CEO. Concerning high demand for stamping parts, terminal and connector, the founder made use of his own knowledge in engineering and devote himself to manufacturing process improving. At first, he designed the tooling with innovative method by relaying the material strip in an opposite position to save material. It is the creative method at that time. And we also use new method to wide-range applicable products, it drove us to cost down in high percentage.

ELECTROLUBE

You can trace Electrolube's roots back to 1941, when Henry Kingsbury formed Kingsbury Components to manufacture volume controls. It was here that Henry formulated a specialist oil, that enhanced the electrical performance and lifetime of the contact surface in addition to reducing the friction between moving parts. This breakthrough was the catalyst for a whole range of contact lubricants, forming the basis of the company now known as Electrolube. Electrolube offers a vast array of products including thermal management materials, conformal coatings, encapsulation resins, electronic cleaning solutions etc.

ELEMENT14

Element14 is one of the fastest growing distributors of electronic components in the world. We are committed to offering the broadest selection of in-stock electronic components and providing the best service possible by helping engineers through the entire design process, from Design to Production. We have been consistently performed on key parameters like availability of products, shipping speed and customer responsiveness. In India we are headquartered in Bangalore, with offices in New Delhi, Pune, Mumbai, Chennai, Hyderabad, Coimbatore, Ahmedabad and Kolkata.

EMBDES TECHNOLOGIES PVT LTD

EmbDes Technologies is a Bengaluru based embedded design service company that offers innovative and flexible solutions/ services for every stage of an electronic product development lifecycle, which includes: hardware design, PCB design, building a prototype board, firmware development, enclosure design, PCB fabrication and PCB assembly for proto and bulk production through competitive in-house capability. The company ensures that the solutions offered always deliver high level of integration, quality, extended product life and, at the same time, lower overall system cost while enabling faster time-to-market.

EMST MARKETING PVT LTD

EMST Marketing Pvt Ltd specialises in SMT, through-hole PCB assembly and wire processing machines. Its product range includes a unique mixture of locally manufactured machines as well as machines from overseas. This is the reason why the company is able to offer cost effective solutions through manual/semi automatic as well as fully automatic solutions. Both PCB assembly and wire processing involve process oriented manufacturing and hence need extensive support, especially for small companies and start-ups. With over 20 years of experience in this field, the company's expertise lies in offering such services to its customers.
