

Toshiba New Generation Stepping Motor Driver For OA Equipment

► Features

Motor type

Unipolar Bipolar

Multiple interfaces

Clocking Parallel

Multiple specs

Voltage/current
Ratings

Multiple packages

Surface-mount
Hole-through

► Toshiba's Original Technologies

Advanced Dynamic Mixed Decay (ADMD)

High Efficient

Low Vibration

Silent

Conventional Mixed Decay

ADMD Technology

Bipolar Stepping Motor Driver
TB67S109A Series TB67S269 Series

Advanced Current Detect System (ACDS)

Current sense resistor less

ACDS Technology

Two resistors can remove by ACSD

Unipolar Stepping Motor Driver
TB67S149 Series

Toshiba Brushless DC Motor Driver For Electrical Fan Equipment

1 Phase Axial Flow Fan

Features

Pseudo sine wave drive

Low vibration

Silent

Conventional Technology

Pseudo sine wave drive Technology

Toshiba original

Driver type
TC78B002 Series

Pre driver type
TC78B006 Series

Speed vs. Current consumption

3 Phase Server Fan

Features

Sensor less drive

Low vibration

Silent

Lead Angle Control

High efficient

Driver type
TB67B008 Series

Fan of Home Appliance

► Features

Pseudo Sine wave drive

Low vibration

Silent

Lead Angle Control

High efficient

Driver type
TB67B000HG

Controller type
TB6634FNG
