

ARM® Computer on Modules: Low on power, high on performance!

Powered by : • NVIDIA® Tegra™ • Freescale® Vybrid™ / i.MX 6 • Marvell® PXA

Use our Computer on Modules in your embedded development

Accelerate
time to
market

Optimize
development
cost

Use proven
solutions

Develop
on latest
SoCs

Leverage
platform
scalability

Avoid
product
obsolescence

Starting from ₹6,855

- Freescale i.MX 6 and NVIDIA Tegra 3 SoC
- Up to 1.4 GHz
- OS: Windows Embedded Compact 7 & 2013, Embedded Linux
- High-Speed interfaces (PCIe, SATA, Gigabit Ethernet)
- 10+ Years product availability

Starting from ₹2,420

- Freescale i.MX 6 & Vybrid; NVIDIA Tegra 3 & 2; Marvell PXA SoC
- 208 MHz - 1.3 GHz scalable performance
- OS: Windows CE 5.0 & 6.0, Windows Embedded Compact 7 & 2013, Embedded Linux
- Extensive industrial interfaces
- 10+ Years product availability
