

*Toshiba is the NAND Flash Memory inventor and market leader.
Break new ground with memory solutions!*

Toshiba NAND Flash Memory Products

SLC NAND Flash Memory SLC NAND/BENAND™

SLC NAND devices have the advantage of higher write/erase cycle endurance, faster read/write speeds and greater reliability. They support customer's business with an extensive product lineup and meet the market demand for higher reliability.

NAND Flash Memory with integrated controller e•MMC™ / UFS

e•MMC™ / UFS integrates a NAND controller and large-capacity NAND memories in the same small BGA package. They help to reduce the workload on the host processor, simplify product development and shorten time-to-market.

SSD Client SSD / Enterprise SSD

SSDs equip the advanced NAND flash memory and are superior in higher performance, low power consumption and resistance to shock and vibration. They realize higher capacity, light weighting, downsizing and underpin the information society.

SD Card/USB/CompactFlash®

EXCERIA™/FlashAir™/TransMemory™/ SeeQVault™ / TransferJet™

Variant mobile removable memory drives with additional high speed interface, digital content protection and wireless data technologies would realize comfortable daily digital life.

SLC: Single Level Cell. A memory cell which can store a bit of information.

* BENAND™ (Built-in-ECC NAND), EXCERIA™, FlashAir™, TransMemory™ are trademarks of TOSHIBA CORPORATION.

* e•MMC™ is a trademark of JEDEC / MMCA.

* SeeQVault™ is a trademark of NSM initiatives LLC.

* TransferJet™ is licensed by the TransferJet Consortium.
