Since this information is subject to change, all those interested are advised to ascertain the details from the organisers before making any commitment.

Snippets

HP set to split into two companies

Hewlett-Packard, the USA, is all set to split into two companies, with effect from November 1 this year. One of the companies would focus on consumer products like PCs and printers, while the other would focus on business systems including hardware and software. It is working on a new type of super-fast computer, being called the Machine, which is expected to be ready sometime in 2017.

PCB Power to offer laser stencils

PCB Power has decided to start shipping high-quality laser stencils for its customers, on demand. Customers would get the option of choosing the type of stencil (framed or frameless). They would also be

able to avail the benefit of a separate price calculator, having a user-friendly concept.

Mitsubishi Electric to build factory in Bengaluru

Mitsubishi Elevator India Pvt Ltd will build a factory in Bengaluru, in order to strengthen local competitiveness and expand business in the world's second largest market for elevators and escalators.

Microchip reclaims top 8-bit microcontroller revenue ranking

Microchip Technology Inc. has reclaimed the top position in 8-bit microcontroller (MCU) revenue, worldwide, according to industry analyst firm Gartner's 2014 rankings.

Xiaomi to set up plant in India

Xiaomi, the world's fifth-largest smartphone maker, is keen on becoming an Indian company, as it looks to invest in a start-up, set up an R&D centre, begin local manufacturing and emerge as India's top handset manufacturer by 2020.

Lei Jun, founder and CEO of Xiaomi, along with co-founder and company president, Bin Lin, has met top Indian business leaders, start-ups, customers and retail partners. He has also launched Mi4i, Xiaomi's first phone to debut outside China.

Asus to set up unit in India

Asustek Computer, Taiwanese company that sells handsets under Asus brand, is setting up a manufacturing unit in India, as it seeks to tap more of the country's fast-growing smartphone market by leveraging the government's Make in India initiative.

The move comes after the budget for fiscal 2015-16 that made importing of handsets more expensive, as part of the government's efforts to promote local manufacturing.

NXP Semiconductors and Freescale announce merger

NXP Semiconductors N.V. and Freescale Semiconductor Ltd have announced the merger of the two companies, combining two great portfolios of complementary products and technologies into one semiconductor company. The respective sales teams and distributors will continue to provide great service and products.

The families and portfolios of products will be combined soon, but for now, the contact point for customers will not change and neither will the products these firms offer. The two companies' portfolios overlap primarily in only one area, RF power products. NXP has decided to sell its RF power portfolio and keep the industry-leading Freescale RF portfolio.

Tesla enters home battery market

Tesla CEO, Elon Musk, is steering his electric car company's battery technology into homes and businesses as part of a plan to reshape the power grid with millions of small power plants made of solar panels on roofs and batteries in garages.

Tesla will make the battery called Powerwall, which will be sold by a variety of other companies.

As with Tesla's electric cars, which start around US\$ 70,000, the battery might be too expensive for most consumers. This could potentially discourage widespread adoption, especially for a product that may only have limited use.
