New policy for solar zones

Indian government is set to launch a policy regarding setting up of solar zones in India. This aims to boost renewable energy projects as well as manufacturing of equipment. Upendra Tripathy, secretary, MNRE, said, "We are bringing out a new policy for what would be called solar zones, each of which will be spread over 100sqkm and will be divided into three parts."

Tripathy also said that the government will offer ₹ 10 million to each state for making a detailed project report. The government will mark solar connectivity points in the report, while business partnerships will be settled between the land owner, the solar power company and the state. The zones will promote wind energy, too.

Indian government to fund solar projects

Funds worth US\$ 50 billion will be provided by Indian government for grid-connected solar PV projects totalling 5GW till 2020. This means that there will be an investment of US\$ 4.4 billion and 30,000 jobs will get created.

These projects will be on a build, own and operate basis through Viability Gap Funding (VGF) route. This is under Batch-IV of Phase II of Jawaharlal Nehru National Solar Mission (JNNSM).

A VGF of US\$ 50.5 billion will be offered through this programme. It will encompass years 2015-2016 till 2019-2020. Funds will be distributed via Solar Energy Corp. of India.
