Andhra Pradesh to be developed as electronics manufacturing hub

Union minister for communication and information technology Ravi Shankar Prasad has said that Andhra Pradesh would be developed as a major electronics hub. He also announced several initiatives planned in this direction.

MIC Electronics, LG Innotek join hands

Domestic electronic display systems manufacturer, MIC Electronics, has signed an agreement with LG Innotek, Korea's leading smartphone camera module maker, to jointly manufacture energy-efficient LED lighting products using components made by LG Innotek.

Onida aims to be US\$ 1 billion company by 2020

Consumer electronics brand Onida is aiming to join the billion-dollar club in the next four years with a six-fold jump

in revenue on the back of smart products targeting youth, besides focusing on expansion in non-metro markets.

Dr Ajay Kumar receives IESA Technovation SARABHAI Award 2015

India Electronics and Semiconductor Association (IESA), the premier body for the ESDM industry in India, has awarded Dr Ajay Kumar, additional secretary, DeITY, the prestigious IESA Technovation SARABHAI Award 2015 for his outstanding contribution to the ESDM industry and its ecosystem.

Microchip to acquire Atmel for US\$ 3.56 billion

USA based Microchip will acquire Atmel with a total equity value of about US\$ 3.56 billion and a total enterprise value of about US\$ 3.40 billion. As per the deal, Microchip will repurchase the approximate number of shares it issues in the acquisition.

Siemens pauses investments in India

German company Siemens, one of the early multinationals to join Make in India campaign, has put a pause on investments in India, but is bullish on long-term opportunities in the country. The company has a diversified presence but has been hurt, like its peers, by the slowdown in capital expenditure and problems in the power sector.

While there is recovery in other businesses that cater to power transmission—railways and roads sectors—the company awaits signs of sustainable and consistent recovery in the economy, according to Sunil Mathur, CEO, Siemens India.

In September 2015, parent company Siemens AG committed to invest US\$ 1 billion in India to add 4000 jobs to its existing workforce of 16,000, becoming the first major European conglomerate to commit to Make in India initiative.

Sharp likely to be taken over

There seems to be a bid to take over the Japanese company Sharp, which has been making losses. Its loss for the year ending in March 2016 is likely to be nearly US\$ 700 million.

While Taiwan's Foxconn Technology Group seems to have offered as much as US\$ 5.1 billion for the company, it is possible that Sharp may go to Innovation Network Corp. of Japan, even though it may offer US\$ 2.6 billion only. Traditionally, Japan does not like selling its precious assets to competing countries.

Sharp is important for Japan's mobile industry to which it provides LCD screens. Its IGZO technology is known for better screen resolution, touch sensitivity, battery life and more. Foxconn could use the technology in its factories in China.

There is also the likelihood of Sharp joining hands with Japan Display to create a new company for making LCD and LED panels. The new entity would be capable of competing with Samsung Display.

Since this information is subject to change, all those interested are advised to ascertain the details from the organisers before making any commitment.

that is, smog caused by automobile and factory emissions. To limit various types of air and water pollution, governments and regulatory bodies have implemented several new regulations. To demonstrate compliance, industries now need to deploy networks of monitoring sensors.

Deep ultraviolet (UVC) LEDs offer a way to create sensors that are lower in cost, yet meet the sensitivity levels and real-time reporting requirements needed to comply with the new regulations. Crystal IS's deep UV LEDs meet this criteria along with industry-leading lifetime of Optan (3000 hours at maximum drive current), providing the added benefit of longer replacement cycles.

Fujifilm aims for 20 per cent growth in India

Fujifilm India is aiming for 20 per cent growth in the next financial year by driving strong marketing initiatives. The company is also launching a new concept, Wonder Photo Shop, which will have a range of photo imaging products and services including the company's camera and photography equipment.

Yasunobu Nishiyama, MD, Fujifilm India, has said, "India being an important market for Fujifilm ranks among top positions when it comes to marketing spends." The company is also participating in marquee industry events across the country.
