

Are You In Suspense?

Are you wondering what happened to your order or payment, even after a fortnight? But did you mention your name and address clearly while sending payment, and what the payment was for?

We get several payments every month without adequate instructions or even identity of the person sending the payment. As a result we are unable to take appropriate action on these, till we get a complaint - if at all.

At EFY, we want you to be our satisfied customer. So please do let us know in case your payment or instructions are not even acknowledged within a fortnight. We are not that lazy!

be independently made use of for testing system parts separately.

While designing an electronic system in the classroom, students can be given an assignment that contains specifications and functional description of the system. Features available in a professional development environment are replicated within the scope of the educational purpose of the project.

Assignments can be downloaded from the Web page where project development phases are guided. Such instructions are not step by step and

imply an intelligent use of simulation tools and a good user initiative.

Making a footprint worldwide

Deeds has been used by thousands of students in Italy and abroad, from hands-on tutored laboratories to project based learning and distance education. Projects are available in Italian and English languages, and are translated to Turkish, Spanish and Catalan languages.

Deeds has been made available free

of charge to institutions and people, and has been adopted by universities and secondary technical education schools. Metropolia University (Helsinki, Finland), University of Deusto (Bilbao, Spain) and School of Business and Engineering Vaud (Switzerland) are some of these.

The fact that teachers' roles overlap with developers' roles guarantees continuity between tools and educational situations. **EFY**
