Metal line switches

SCHURTER is expanding its PSE, piezo metal switch and MCS 30, the mechanical metal switch series, with new illumination possibilities powered by variable input voltages. The RGB colour technology used makes it possible to indicate up to seven illumination colour options with just one switch. Variable power supply offers a homogenous and brilliant illumination within a voltage range of 5V DC to 28V DC.

Analogue timer

SHAVISON has launched a series of DIN rail-mounted analogue timers.

These are available in different operating modes, namely, On Delay, On Delay/Interval, Star-Delta, Cyclic On First or Off First, True Power Off, Forward-Pause Reverse and Pulse On First or Off First. These are available in different time ranges, too. All timers have a setting accuracy of ± 5 per cent of full scale and repeat accuracy of ± 0.5 per cent or 50 minutes.

Flash memory technology

Renesas has announced the development of 90-nanometer one-transistor

MONOS (1T-MONOS) flash memory technology that can be used in combination with a variety of processes such as CMOS and bipolar CMOS DMOS (BiCDMOS), and provides high program/erase (P/E) endurance and low rewrite energy consumption.

Fingerprint sensor

Fingerprint Cards (FPC) has launched FPC1268, a touch fingerprint sensor in FPC1200 series with FPC OneTouch. The new sensor can be completely hidden under the cover glass of smartphones, allowing for fingerprint capability without a dedicated button.

T&M

Multi-function appliance meter

MECO offers a single-phase multifunction appliance meter, TRMS, model EM09 (20A, 5A and 1A). It measures

ten parameters on ten display pages on a large LCD display (20mm). It is equipped

with five keys to view all parameters and for programming of the meter.

Key features are:

- Measures V, A, PF, Hz, kW, kVA, kVar, kWh, kVAh and kVarh
- TRMS measurement
- Auto/manual scroll display (user selectable)
- Portable, easy to carry and simple to use

- LCD display with backlight

Automatic transformer turn-ratio meter

This automatic transformer turn-ratio meter, VTRM, has the following key features:

- Fully-automatic measurement of transformer turn-ratio

- Excitation current, HV and LV voltage, polarity and per cent deviation measurement
- 3-phase connections enable simpler and faster testing
- Test voltage through on/off switch and LED indication
- 0.1 per cent accurate measurement by 24-bit technology
- Reverse-polarity indication by LED and LCD
- Over-current protection for short-ended winding

RC analyser

Anritsu's MT8820C radio communication (RC) analyser now integrates with

both DASY6 and eSAR3D from Schmid & Partner Engineering AG (SPEAG) to provide seamless specific absorption
