Temperature controller

RE57 is a compact temperature controller with universal input selection range

with RTD, thermocouples and standard signals. It is equipped with relay and SSR driving

outputs. Features include switching between auto and manual mode, and timer function.

Signal analyser

X-series signal analysers provide significantly-enhanced capabilities for developers for creating next-generation devices. Most notable is a multi-

touch user interface that streamlines measurement setup and creates a solid foundation for new solutions. Performance improvements and feature enhancements address emerging needs in aerospace, defense and wireless communications.

LIGHTING

Solar streetlight

All-in-one solar streetlight is a compact lighting solution integrating solar panels, LED light, lithium-ion battery and a PIR motion sensor. It incorporates proprietary Systellar LED driver technology that combines world-class battery-charging technology with high-efficiency electronics.

The streetlight uses a PIR motion sensor to adjust LED light brightness intelligently. On detecting any

movement, LED glows at full brightness. If no movement is detected for more than one minute, brightness is reduced to one-third.

LED floodlight

R. STAHL has developed an LED light source floodlight for Zone 2 hazardous area type number 6525. The Luminaire is IEC Ex certified, with its design conforming to the latest IEC standard. It is available in two variants with wattages: 120W and 210 W. 120W variant comes without a heat-sink, while 210W variant is provided with a heat-sink.

MISCELLANEOUS

Windows 10 IoT core

Toradex has announced the availability of a technical preview of Windows 10 IoT Core on an ARM based system on module (SoM). The preview is designed to test and evaluate the new features of Windows 10 IoT Core on an industrial-grade embedded computing platform. It is based on Colibri T30 powered by NVIDIA Tegra 3, a powerful ARM Cortex-A9 quad-core embedded processor.

Cloud based IDE

Microchip Technology has announced its MPLABR Xpress Cloud based integrated development environment (IDE). This online development platform is the easiest way to get started with PICR microcontrollers, with zero downloads, sign-in or setup needed to start designing. Microchip's free, Cloud based IDE brings the features of MPLAB X IDE to Internet-connected PCs, laptops or tablets.

Video management solution

SATATYA SAMAS is an all-in-one enterprise video management solution, which provides complete centralised control over security and safety to the staff entrusted with overall security. This intelligent preventive solution allows centralised control with detailed and contextual live monitoring and playback, fool-proof management of the connected devices and identifying, notifying and reacting to any unexpected events.

3D printer

Nobel 1.0 is a highly-accurate professional desktop SL 3D printer, with a print resolution up to 300 microns

and a layer thickness of 25, 50, and 100 microns. It has a maximum build size of 128mm x

128mm x 200mm (5-inch x 5-inch x 7.9-inch). Nobel 1.0 is a plug-and-play 3D printer featuring a USB port; users can simply plug in a USB drive and press print.
