

Fig. 8: New channel

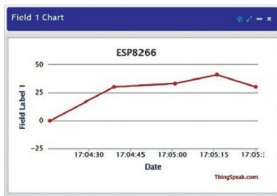

Fig. 9: Temperature data plotted graph on [www.thingspeak.com](http://www.thingspeak.com)

nel under Data IMPORT/EXPORT section, you will get your API key. Call this link [www.api.thingspeak.com/update?key=\[THINGSPEAK\\_KEY\]&field1=0](http://www.api.thingspeak.com/update?key=[THINGSPEAK_KEY]&field1=0) by changing the field value and give any number you want to upload. In Private View section, you will see a graph of the data as shown in Fig. 9.

For checking the results on a smartphone or PC, a link is provided in the respective channel. It would

be something like [http://api.thingspeak.com/channels/channel\\_id/feed.json?key=api\\_key](http://api.thingspeak.com/channels/channel_id/feed.json?key=api_key)

In this link, API key is replaced by Read API key and channel ID is replaced by the user's channel ID. Copy and paste this link in search bar of the browser in your smartphone or PC. You will get the recorded temperature data information.

If temperature data has been uploaded, you will be able to see the graph here. Temperature data on [www.thingspeak.com](http://www.thingspeak.com) is shown in Fig. 9. You are now ready to go with your first IoT project.

## Applications

This project can be used as a guide for various other related projects for your home systems; not just temperature but also energy consumption and many other interfaces that can be easily checked on your smartphone. **EPY**

Osho Gera is a second-year B.Tech student, studying at Bharati Vidyapeeth's College of Engineering, New Delhi

## EFY Note

The source code of this project is included in this month's EFY DVD and is also available for free download at [source.efymag.com](http://source.efymag.com)

# Control with Precision

## RE57 Temperature Control

- Universal Measuring Input
- Digital Input Filter - Timer settable from 0... 999.9 seconds
- Control Type: PID and ON/OFF
- Onsite Mode Selection: Auto / Manual
- Timer Function: with 5 functional selection
- Onsite programmability - Heating / cooling
- Output on Failure function
