Study mobile app for students

Smartur.com, a digital education solutions provider, has launched a study application for class X students. The app is based on the principles of neuroscience of learning and psychology of motivation, and currently covers critical subjects of science and mathematics. It provides parents with comprehensive analytics to monitor the progress of their child/children. It is currently available for Android devices and can be downloaded for free from Google Play.

Collage-making app. Layout, from Instagram

Instagram has launched a standalone application that makes it easy to create collages of iPhone pictures. It features the ability to automatically find pictures containing faces and the option of sharing collages on the leading social network, Facebook, as well as on Instagram.

GottaGo, an app for locating restrooms

The aptly-named, GottaGo, app helps locate clean restrooms in your vicinity on your phone using GPS. It lists restrooms in hospitals, metro stations, malls, museums as well as the public convenience option on Google maps, along with the distance from your location and the route. Once you select a particular restroom, you can give it a rating on the basis your experience. It currently works only in Mumbai, Pune, Delhi-NCR, Bengaluru and Chennai.

Ozone launches Ozone Connect app

Ozone, an Internet service provider, has launched an app that will allow mobile phone users to connect to any of their free Wi-Fi hotspots automatically as soon as they come into an Ozone Wi-Fi hotspot. Customers will have to register with the app only once, followed by authentication through SMS, as mandated by the telecom regulator.

Creativity tablet by Eddy and Cartoon Network Enterprises

World's first creativity tablet for kids

The Creativity tablet comes with a three-layered screen, with the top layer having diamond-like hardness.

It is scratch-proof and impact-resistant; no matter how roughly the child treats it, the tablet stays protected. Its anti-shatter technology protects the child from hurting himself/herself in case the screen breaks on dropping.

The tablet has been approved for use by children by leading ophthalmologists. Its screen has a unique UV ray protection layer that protects eyesight. The high-clarity screen comes with IPS and provides better viewing angles, ensuring lower eye-strain.

It even comes with a library that contains books, fairy tales and popular classics.
