

**A CODEC CHIP THAT
ACHIEVED 50% COMPRESSION
IN DEVELOPMENT TIME.**

THAT'S MODEL-BASED DESIGN.

To be first to market with a next-generation mixed-signal chip, the IC design team at Realtek used system models to continuously verify their design. The result: 50% less time to completion and a 50% market share. To learn more and to request the IBS study on Simulink ROI in Electronic Design, visit mathworks.in/mbd
