

MITRAMAX ENERGY GmbH GERMANY ANNOUNCES

SUNFED™ OFF GRID SINE-WAVE SOLAR INVERTERS

Efficient:

- Maximum efficiency +90%
- Low no load losses saves big energy loss
- Intelligent battery management –longer life

Simple:

- Easy and Quick commissioning
- Complete off-grid management
- Excellent for battery + Line back-up

SUNFED Hi-tech Sine-wave Solar Inverters from MITRAMAX ENERGY are based on a carefully developed technology that optimises the use of Solar Energy. Its less than 1% No Load Loss saves unnecessary 24 hr draining of battery, feature absent in other conventional Inverters on market. SUNFED's high efficiency torroid-cored output transformer and its 90% efficient topology ensures peak energy production. It is designed for long-life and maintenance free operation.

SUNFED's USB port allows comprehensive graphic data-logging on any Personal Computer. SUNFED Inverters can be integrated into any off-grid power systems up from 1kVA to 10kVA in size. When used with our energy sucking LEECH PV modules it harvests 10 to 25% more energy.

Flexible:

- SUNFED systems; 1kW to 10kW
- Ideal to go with Sun in any place;
- In deserts, forests and hinterlands

Durable:

- High short term overload capability
- Active thermal management system
- Two-year standard warranty

MODERN PATENTED SOLAR ENERGY PROCESSING RESULTS IN 10 TO 25% HIGHER ENERGY YIELD

MITRAMAX GERMANY'S LEECH HV PV SOLAR MODULES

MITRAMAX ENERGY's Australian Innovation Patent for in-Module energy processing is yet pending in India and other countries. This is now a globally recognised solution. Many venture funded international companies today market such energy processors. Factory integrated Energy Maximisers enables LEECH HV PV Modules offer 10 to 25% more Solar Energy due to its unique MPPT algorithm and inbuilt energy management to deliver peak power energy at any Battery Voltage. LEECH HV PV Modules are available as 12, 24, 48, 96, 192V, 240V and 360V DC acting Automatic Battery Float Chargers. LEECH PV MODULES are ideal for any Off-Grid PV Solar Plants from 1kW to 500kW.

LEECH PV MODULES HELP TO BUILD ROOFTOP PV SOLAR PLANT IN A FEW HOURS
