

ARM® Computer on Modules: Low on power, high on performance!

Powered by : • NVIDIA® Tegra™ • Freescale® i.MX 6 • Freescale® Vybrid™

**WE EMBED
SUCCESS
IN YOUR PRODUCTS!**

Your ideal partner for embedded computing boards:
Computer on Modules & Single Board Computers

Make your products future-proof and scalable with pin-compatible platforms

Ensure longevity of your products with 10+ years supported platforms

Free lifetime maintenance with OS updates, feature additions

Highly optimized BSPs developed in-house

Free premium direct technical support by developers

Competitive and transparent pricing with direct online sales

Extensive online technical resources and carrier board designs

Extensive partner network for hardware & software services

Independent warehouses to ensure ex-stock deliveries

Computer on Modules

- Application-agnostic compact embedded computing platform
- Ideal for building scalable and cost-sensitive industrial products

Customized Single Board Computer

- Ready-to-use, yet customizable embedded computing board
- Ideal for building industrial products with fast time-to-market

3rd Floor, LXY Aura, 99/D, KHB Colony, Koramangala, 5th Block, Bangalore-560095, India
