

Buying Rooftop Solar?

New Field-proven Technology **SAVES YOU MONEY...LOTS!**

Here is how?

**Mintramax Energy has Australian Innovation
Patent For LEECH PV SOLAR MODULES THAT
HARVEST 15% TO 20% MORE SOLAR ENERGY**

MITRAMAX ENERGY Saves 15 to 20% of your Capital Cost with its patented Super-Yield LEECH HV PV Solar Modules with embedded MPPT+DC Boost like no one else.

For example,
Buying MITRAMAX 8kWp PV Solar Array
will give almost same energy output as
from a conventional 10kWp PV Solar Plant!

UNIQUE FEATURES of LEECH PV TECHNOLOGY

- Extracts maximum solar energy 'like a Leech' from a PV Module
- Patented ruggedized Controller; integrated MPPT + DC Boost
- LEECH PV Modules harvest 15 to 20% more solar energy
- Daisy Chain of LEECH saves time & junction boxes
- Can connect Hundreds of LEECH modules for higher energy
- No matching of modules is essential like in a series strings array
- Avoids huge energy loss caused by shadow in series strings used
- Avoids conduction losses due to currents with fewer junction boxes
- Environmentally designed to work at temp from -40°C to $+80^{\circ}\text{C}$
