Delhi Government launches Pooch0

The people of Delhi will now be able to book auto-rickshaws using their smartphones as an app based taxi service has been initiated in the national capital for their convenience. Pooch0, the mobile based app will bring all 90,000 auto rickshaws under it. It has been developed by Delhi Integrated Multi-Model Transit System (DIMTS).

Google launches public transport app in Delhi

Internet giant Google has launched Delhi Public Transport app, which aims to make life easier for the residents of New Delhi to get around on public transport. The app will be built into Google Maps and will help users get transit directions easily even when the connection is slow and data is difficult to access. It will use the same transit data for DMRC metro, DTC buses, DIMTS (orange) buses and Gurgaon Rapid Metro as that found on Google Maps and available offline for users.

Shoto, a secure, private photo-sharing app

Shoto allows you to share photos with friends privately and securely. Whenever a user clicks some photos, it organises these into albums and lets his or her friends (who are also using the app) discover these. The app makes use of several parameters like the time the photo was clicked and its location, and it uses an algorithm that recognises which friends were with the user when the photos were taken. It is available on Android and iOS OSes.

Microsoft unveils Linux based OS

Microsoft has announced a Linux based OS named ACS, or Azure Cloud Switch, which will work as an open source podium eligible for running various networking devices along with cloud based services that it will be able to perform on.

Samsung launches Galaxy Tab S2

An exceptionally lightweight and slim tablet

Samsung's new tablet, Galaxy Tab S2, provides you with an ideal environment for performing office tasks. It features 1.9GHz, 1.3GHz CPU speed, octa-core processor and a super-AMOLED, 2048 x 1536 (QXGA) display, among others. It allows you to run multiple apps in split-screen mode or in draggable pop-up windows. The tablet also comes with a fingerprint scanner for added security. Its 8MP camera and f/1.9-aperture lens allows you to take brighter and crisper pictures and videos, even in low-light conditions.
