Silan Microelectronics:
HALL 12, M10

Founded in 1997, Silan Microelectronics has been continuously pursuing product innovation, providing high quality ICs and excellent services to customers.

In 2003, Silan made an IPO offer and was listed in Shanghai Exchange, as the first IC design company of China. Over last twelve years of development, Silan has become one of the largest integrated enterprises in IC designing and manufacturing (IDM).

Based on in-house wafer Fab and advanced BCD&HV IC process technology, Silan has become a company with the most valuable brand image, offering the richest product portfolio with many products ranked number one position in Chinese market: AC/DC converter, LED lighting driver, IPM, solar inverter IC & solution and etc.

With full range of LED driver ICs supporting up to 90W power application, Silan products have been widely used in spot light, tube light, bulb, down light, ceiling light, street light, head/tail light, etc. Over 20 patents have been obtained up to now.

- SD650X
Non-isolated High-voltage Linear Series (PF>0.5)
Typical Application: LED Bulb
- SD660X
Isolated PSR Controller Series (PF>0.5)
Typical Application: LED spotlights, Downlight
- SD670X
Non-isolated Series (PF>0.5)
Typical Application: LED Bulb
- SD680X
Isolated PSR Controller Series (PF>0.9, THD<10%)
Typical Application: Downlight, Ceiling Light, Streetlight
- SD692X
Non-isolated Series (PF>0.9, THD<15%)
Typical Application: LED Bulb, Tube Light
- SDH700X
Triac Dimming Series (PF>0.9)
Typical Application: LED Bulb, LED spotlights, Downlight
- SD4252X
DC/DC Constant Current Controller Series
Typical Application: LED Panel Light, Streetlight, Automotive lighting
- SDH750X
PWM Dimming Controller Compatible (PF>0.9)
Typical Application: LED Bulb, Downlight, Ceiling Light
- SC51RF7508
2.4G wireless communication IC with MCU integrated
Typical Application: Downlight, Ceiling Light
