

BINAY - Lighting Up The Future

BINAY LED-based HIGH, MEDIUM and LOW Intensity Aviation Obstruction Light Beacons

As per International Civil Aviation Organisation (ICAO) requirements Available in Low Intensity, Medium Intensity and High Intensity versions (as per International Civil Aviation Organization guidelines), BINAY's patented LED Aviation Lights come with 5-year/3-year warranties

LED Obstruction Lighting for:

- Industrial chimneys and smokestacks
- Transmission, microwave and cellular towers
- Radio, TV and similar structural towers
- High-rise buildings and structures
- Airports and airfields

The BINAY LED Aviation Obstruction Light offers the following advantages:

- Fit-and-forget maintenance-free operation
- A long life of 100,000 hours (20 years at 12 hours daily burning)
- Pays for itself within a short period of operation in the form of reduced installation, maintenance and servicing costs
- Quick Installation; Reliable operation 365 days per year
- Shock-proof and vibration-resistant
- Over-Designed Intensity to allow for natural LED Intensity degradation over its operating lifetime

THE BINAY LED OBSTRUCTION LIGHT IS UNDER ACCEPTED PATENT, AND AS SUCH IS A PROPRIETARY PRODUCT

POWERING LED TECHNOLOGIES WORLDWIDE SINCE 1983

In cruise, the main 300hp engine of the flying car provides thrust and charges the batteries (Image courtesy: www.terraflugia.com)

avoiding air-traffic, bad weather and restricted and tower-controlled airspace, and will have a full-vehicle parachute system that could be activated by the operator in case of an emergency. And if the operator becomes unresponsive, TF-X would automatically implement an emergency auto-land at the nearest airport.

Once the car is back on ground, the wing of the car would fold down in a matter of seconds to make it suitable for use as a road-going plug-in hybrid once again.

Airplane wings can now fold up

ICON A5 is the perfect companion for weekend camping trips. It does not rely on pilots who can recover from emergency situations; instead, it works on spin resistance. The aircraft has earned Light Sport Aircraft airworthiness certificate from Federal Aviation Administration, USA.

According to ICON co-founder Kirk Hawkins, "The plane is very forgiving, if the pilot makes a mistake." It gives all the warning signs, and if you stay in trouble, the plane does not lose control or drop out of the sky.

According to ICON, A spin, the cause of 41 per cent of all pilot-related fatalities, is caused when an aircraft slows down so much that it stops flying. It falls to the ground in an out-of-control spiral.

ICON's main goal was to eliminate this issue. Before a spin even occurs, ICON A5 signals to the pilot that
