Local Interconnect Network

Microchip offers support for a variety of wired and wireless communication protocols, including peripheral devices and solutions that are integrated with a PIC® Microcontroller (MCU).

Wireless connectivity options include: Wi-Fi®, Bluetooth®, 802.15.4/ ZigBee® and our proprietary MiWi™ wireless networking protocol. Other connectivity protocols supported include USB (device, host, OTG and hubs), Ethernet, CAN, LIN, IrDA® and RS-485.

All of these protocols are supported with free software libraries, low-cost development platforms and free samples.
