IPC releases annual electronics industry quality benchmark study

The IPC association has released *IPC Study of Quality Benchmarks for Electronics Assembly 2015*. It provides data to electronics assembly companies interested in comparing their quality measurements to those of other assembly companies by company size, region and type of product.

The survey based study addresses five major groups of manufacturing and service measurements, namely, production, quality control, customer satisfaction, supplier performance and certification status. The survey sample includes 65 original equipment manufacturers (OEMs) and electronic manufacturing services (EMS) companies from the Americas, Europe and Asia with annual sales ranging from under US\$ 10 million to more than US\$ 500 million.

Most Philips products feature Made in India component

According to sources, almost every product offered by consumer electronics giant Royal Philips has a Made in India component.

Pieter Nota, executive VP and leader of Philips HealthTech, has said that focus is being given to the lighting business in India, given Prime Minister Narendra Modi government's 100 smartcities project, and to ensure affordable products to people. Since air quality is a serious issue in India, the company is also focusing on air purifiers.

The campus at Bengaluru called Philips Innovation Centre has over 2000 engineers, medical professionals and researchers, who provide support to almost every vertical of the parent company. Its Pune Development Centre is among six main facilities worldwide and contributes to health-care, while that in Noida works on lighting.
