Electronic weighing-scales maker Eagle Scales is targeting to earn a revenue of ₹ 1 billion in this financial year from last fiscal's ₹ 750 million. Eagle is involved in the whole spectrum of electronic weighing

scales market and plans to enter the growing health segment.

Motorola Mobility to take over Lenovo's mobile business

Chicago based Motorola Mobility plans to absorb the mobile unit of Lenovo, the Beijing based technology giant. The company would restructure its Mobile Business Group to drive growth. The Group will align smartphone development, production and manufacturing and better leverage the complementary strengths of the two companies to drive growth.

Sony focuses on Make in India

Electronics major Sony India has said that it will increase its focus on Make in India campaign with more domestically-made products, beginning with flat TV panels. The company has 23 stock keeping units for panels or television models. It has undergone outsourcing tie-up with a Chennai based firm for making televisions.

Avnet leverages open source prototyping platform

Avnet Inc. has announced the availability of MicroZed Carrier Card Kit for Arduino, a versatile Arduino-compatible carrier card for Avnet's MicroZed system on module (SoM). The platform enables designers involved in industrial control, remote sensing, embedded vision and many other IoT-centric applications, to quickly develop prototypes that combine the MicroZed SoM with the large ecosystem of Arduino shields.

Samsung to focus on CE business ahead of festive season

Samsung India has merged two of its three verticals of consumer electronics (CE) business and changed business heads in a midyear reshuffle ahead of the upcoming festive season. The company has merged the vertical that managed its own brand stores with retail sales that dealt with independent dealers and distributors. The regional retail vertical, which caters to large regional chains such as Viveks, Adishwar Retail, Great Eastern and Vijay Sales will continue as it is.

The management rejig has been driven by Samsung India Electronics

president and CEO, Hyun Chil Hong, who wants to ensure that the consumer electronics business is not neglected due to excessive focus on the firm's smartphone business in India.

ACME Group to build solar power in Telangana

ACME Group has announced that it has received orders to build solar-power-generating capacity of up to 446MW from Telangana State Southern Power Distribution Co. Ltd (TSSPDCL) and Telangana State Northern Power Distribution Co. Ltd (TSPNDCL). The projects will be implemented at 18 different locations across the state.

Having bagged the 446MW solar tender in Telangana, the group accounts for 22 per cent of the 2000MW tender. With this, the company has emerged as one of the top players in India's solar power segment.

Kyocera rolls out manufacturing plant in Jamshedpur

Japanese firm Kyocera, which manufactures ceramics and electronic components, has launched its first manufacturing plant in Jamshedpur, Jharkhand. Kyocera has also signed an agreement with CTC Pvt Ltd to mark its presence in the Indian market.

Kyocera CTC Precision Tools Pvt Ltd recently conducted a distributors' meeting in Jamshedpur. CTC is an exporter, manufacturer and supplier of drills and routers, based in Jamshedpur.

Kyocera's partnership with the Jamshedpur based firm and the launch of its own manufacturing plant reveal the company's plans for the Indian market. Kyocera is also looking at manufacturing micro-drills for PCBs and hole-making tools that fall under the category of micro-industrial tools.

According to sources in CTC, its association with the Japanese company will be beneficial not just for the two firms but also to customers in India. Founded in 1959, Kyocera now has a market presence in four cities across India, including Gurgaon, Chennai, Bengaluru and Pune.

piece in the government's ambitious programme to develop 100 smartcities. Havells India CMD, Anil Rai Gupta, has said that the company is developing technologies where the streetlights could communicate. These would include chip or wireless communication.

The government has come out with a list of 98 cities to be developed under this project. These cities together have a population of 130 million, accounting for 35 per cent of India's urban population.

Havells, a US\$ 1.4 billion company, had acquired a majority stake in Bengaluru based LED and solar light manufacturer Promptec Renewable Energy Solutions.
